- Safe and secure by design
- Full scope deliveries
- World-leading technology
- Trusted partner globally

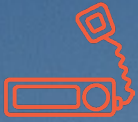

Safe Journey!

Jotron develops and manufactures easy-to-use solutions backed by strong engineering, reliable delivery, and lifetime support. Used individually or as an integrated system, our radio, VCS, and recorder solutions simplify operations, reduce maintenance, and deliver lower total cost of ownership throughout the entire lifecycle.

For us, “**Safe Journey**” is more than a marketing tagline - it is a promise.

Connect - Reliable ground-to-air radios

Our radios are built for mission-critical performance, delivering exceptional audio quality and long term reliability. Fully integrated with the Voice Communication System (VCS) platform, they ensure clear and instant communication even during peak traffic and challenging conditions.

Respond - Unified voice communication

Jotron develops and manufactures world-leading VCS for Air Traffic Control (ATC) operations worldwide. Combined with Jotron's ground-to-air radios, this creates a seamless communication chain from controller to cockpit. Reliable, scalable, and designed for demanding ATC environments.

Record - Complete situational reconstruction

Jotron Ricochet is the "black-box" of ATC operations worldwide. Recording screen activity, communication, radar data, and ambient sound. With millisecond-accurate replay and unlimited data capacity, Ricochet supports training, quality assurance, and incident investigation. The Ricochet Investigator further accelerates the investigative process using speech-to-text transcription, allowing events to be reconstructed faster and more efficiently.

Support - Expertise you can trust

Our support team is consistently praised by customers for their extensive technical knowledge and practical understanding of ATC operations. From installation to lifetime support, Jotron stands behind every system we deliver.
