

TronTracker TA10 Transmitter

Product Dismantling and Recycling

Part Number: 105650

- 1) Tools are required to disassemble TronTracker TA10 Transmitter.
- 2) The TronTracker TA10 Transmitter consists of a battery module, a printed circuit board, rubber and plastic parts.
- 3) Disassemble the TronTracker TA10 Transmitter as shown above in the pictogram and separate the parts accordingly.

JOTRON and its subsidiaries assume no responsibility for any errors that may appear in this publication, or for damages arising from the information there. JOTRON is certified according to NS-EN ISO 9001 / 14001 / 27001. JOTRON reserves the right to modify design and specifications without further notice.

Product Dismantling and Recycling

Part Number: 105650

MECHANICAL / HOUSING

ELECTRONICS

BATTERY

<p>The mechanical housing on the TronTracker TA10 Transmitter consists of plastic parts, rubber gaskets and some minor metallic parts.</p>	<p>The TronTracker TA10 Transmitter consists of one main printed circuit-board and must be recycled according to local regulations since some of the components might consist of critical raw materials.</p>	<p>The TronTracker TA10 Transmitter consists of one Rechargeable Lithium battery from Samsung.</p>

PROPER PRODUCT RECYCLING

For proper product disposal and recycling, please:

- Consult your local authorities about your country's disposal and recycling rules and regulations.
- Observe the applicable WEEE (Waste from Electrical and Electronic Equipment) rules.

TronTracker TA10 Transmitter

Product Dismantling and Recycling

Part Number: 105650

CRITICAL RAW MATERIAL (CRM) CONTENT PER COMMODITY TYPE

Critical raw materials (CRMs) are of high economic importance and have a high risk of supply chain disruption. In 2023, EU published a fifth list of 34 CRMs in the Annex II of [the Regulation proposal COM\(2023\)](#) based on the [Study on the Critical Raw Materials for the EU 2023 – Final Report](#).

Based on the fifth list from 2023 of critical raw materials for the EU, Jotron has conducted an analysis of CRM content in the company's products. The content is limited to information sourced by responses and documentation from suppliers and manufacturers. The sourcing of documentation was done by questions on email, phone calls, meetings and searching verified online pages. The CRM content is limited to commodity group, not part specific.

The table below lists Jotron's commodity types that may contain critical raw materials (CRMs).

Capacitor	Connector	Diode	Fasteners	Fuse
Aluminium (bauxite) Copper	Brass (copper) Nickel	Copper Silicon	NA	Aluminium (bauxite) Copper Nickel
Inductive parts	Integrated circuit	Memory	Metal sheet	Opto
Magnesium Titanium dioxide	Aluminium (bauxite) Copper	Aluminium (bauxite) Baron Copper	Aluminium (bauxite) Copper Nickel	Fluorine Possible terbium* in display
Printed circuit boards	Relay	Resistor	Switchers	Batteries
Copper	Aluminium (bauxite) Copper Nickel	Aluminium (bauxite) Bismuth Boron Nickel Silicon Titanate (titanium)	Aluminium (bauxite) Copper Manganese Nickel Silicon	Aluminium Cobolt Copper Gallium Lithium Manganese Nickel

*Heavy rare earth element
